

FINAL AGENDA

MSF PAEDIATRIC DAYS

November 29, 30 & December 1, 2022, VIRTUAL EDITION

The MSF Paediatric Days is a virtual space in which diverse participants may learn, network, and enjoy the company of colleagues in an environment of mutual respect. A warm welcome to you, MSF staff, researcher, decision maker, practitioner in the field of humanitarian paediatrics and others.

Our objective is to exchange ideas, align efforts, inspire, and share frontline research to advance urgent paediatric issues of direct concern to the humanitarian field. We will open the discussion on the challenges we face, give the floor to colleagues who will share their experiences and discuss ways forward.

During the event you will have the opportunity to:

- **Listen to live presentations in the auditorium with simultaneous English and French translations;**
- **Have 'Conversations over Coffee' with speakers and presenters**
- **Interact with other delegates in the Networking Area or through a Chat;**
- **Visit the Virtual Booths;**
- **Read Posters and watch PaED Talks;**
- **Download and read documents in the Resource Centre;**
- **And much more!**

We hope to meet you there,

The MSF Paediatric Days Team
